Mini panels transform every setting into an ambiance with a modern touch to it with its systematic radiance and uniform lighting.

V-TAC offers the widest range in this product category. We also stock all three colour outputs from white to warm white and day light .They all come in retrofit cut out sizes from 4 inches, 6 inches and 8 inches.

LED Nano Plastic Tubes

A revolutionary LED Lighting Solution

High Lumen
SMD

A clear nine point advantage over any conventional glass LED tube!

Nano plastic tube has better light transmittance

This product is almost unbreakable

Light emitted is softer

Light emitted is even across the angle and hence diffuses the glare

The luminous efficiency of the light can reach up to 92%

The bending endurance is twice better than the normal polycarbonate lens

The thickness of a Nano plastic tube is just 0.4 to 0.5 mm

This new material has super thermal conductivity

The internal convection holes can release a great amount of heat from the tube light

LED Tube Lights

Transform your existing space and make it more sustainable & beautify. V-TAC LED Tube Series perfectly fit into existing linear fixtures and provide comparably better light levels to current Linear fluorescent systems .

Product Features
